

Every day is another opportunity to make Martha's Vineyard an age-friendly Island.

Healthy Aging Martha's Vineyard is educating, advocating, and mobilizing to meet the needs of aging adults and the people who care about them.

Our **resources** create safe access to shops and businesses and improve safety at home with grab bars for bathrooms, banisters for stairways, and proper lighting.

Our **coalitions** connect people with the right resources for advance care planning, digital equity education, and reducing the risk of falls while improving recovery rates.

One of our **initiatives** coordinates on-demand transportation, while another is designed to ease the isolation of aging adults while providing housing for our Island workforce.

Join us today. Engage in our vibrant community and support us. Because when it comes to aging, we're all in this together.
